

10 Ways Sentric Can Help Your Organization

Why Sentric?

Here's 10 Reasons...

Sentric Puts the "Solution" in Workforce Solutions

Through our end-to-end workforce solutions – the most usable in the market – we help businesses with payroll, time and labor management, workforce management and human resources administration including compliance, benefit administration, performance management, recruitment and everything else needed to ensure effective and meaningful talent management.

Our end-to-end solution automates everything from recruitment to retirement and it's delivered "In The Cloud."

1. With Sentric, you get more than software. **You get a solution** backed by a company that provides:
 - *Experience – Serving thousands of clients since 1994*
 - *Expertise – Certified staff serving our clients*
 - *Stability – SAS70 Type II Compliant*
 - *Small Business Feel with Big Business Credentials*
2. SaaS solutions that **improve control over labor costs** through sophisticated time and attendance features integrated with payroll and HR.
3. Reduce time associated with administration and ensure compliance through **streamlined workflow processes**.
5. **Eliminate manual processes and drive efficiency** through the use of automated workflow routing and alerts.
6. **Strengthen your people processes** for screening, hiring, developing, evaluating, compensating, and terminating employees.
7. **Ensure compliance** with federal, state and local laws and regulations.
8. **Support your entire workforce** with a fully-configurable, scalable solution. Choose one or more modules today that address your needs and add other modules and services as your organization evolves.
9. Cloud-based deployment means **access online, anytime**, via portals which connect you to tools, data, controls, and alerts; no expensive upgrades or server investment. Always on. Always current.
10. **Our award-winning client service model** ensures our clients receive the right solution to fit their unique needs. Our proven implementation methodology allows you to:
 - *Reduce implementation costs.*
 - *Ensure your team is properly-trained by certified professionals*
 - *Deploy your solution rapidly.*
 - *Ensure you get the 'right' solution*
